

Low Impact Development in Coastal South Carolina: A Planning and Design Guide

This publication was made possible through support from the National Estuarine Research Reserve System Science Collaborative, a partnership of the National Oceanic and Atmospheric Administration and the University of New Hampshire. The Science Collaborative advances the use of science in coastal decision making by engaging intended users of the science in the research process – from problem definition to practical application of results.

Advisory Committee

The **Advisory Committee** provided guidance and feedback on the content of this document, developed and participated in workshops, and engaged stakeholders. We would like to thank them for their enthusiasm, knowledge, experience, and commitment to the process.

Samantha Bruce, *South Carolina Sea Grant Consortium*

Kimberly Counts, *Clemson University Cooperative Extension Service, Carolina Clear*

Amanda Flake, *Beaufort County Planning Department*

Guinn Garrett, *Clemson University Cooperative Extension Service, Carolina Clear*

Leigh W. Kane, *Horry County Planning & Zoning*

Katie McKain, *City of Charleston Planning, Preservation, and Sustainability Department*

Lauton Sutley, *SC Department of Natural Resources & ACE Basin National Estuarine Research Reserve*

Lisa Vandiver, *NOAA Restoration Center*

Technical Advisers

Professionals along the coast volunteered their time and expertise for the LID Manual and were a great asset to this project. We would like to thank them for attending meetings, presenting at workshops, and providing thorough and thoughtful reviews of draft materials.

James B. Atkins, *Richland County Conservation Department*

Brian Bates, *Woolpert*

Chris Berg, *College of Charleston MES Program & SC Department of Natural Resources*

TABLE OF CONTENTS

Acknowledgements	i
List of Figures	xiv
List of Tables.....	xx
Chapter 1: Introduction to Low Impact Development in Coastal South Carolina	1-1
1.1 Introduction to LID	1-1
What is LID?	1-1
The Need for Coastal South Carolina LID Guidance	1-2
Manual Purpose and Application	1-3
1.2 Benefits of LID	1-4
Overview	1-4
Environmental Benefits of LID	1-5
Economic Benefits of LID	1-8
Evaluating Cost Effectiveness of LID	1-14
1.3 Coastal Features and LID	1-15
Flat Terrain	1-17
High Water Table.....	1-17
Altered Drainage	1-17
Poorly Drained Soils.....	1-17
Very Well-Drained Soils	1-17
Conversion of Croplands with Land Application	1-19
Pollutants of Concern.....	1-19
Unique Development Patterns	1-19
The Highway as the Receiving System	1-19
Hurricanes and Flooding	1-20
Future Conditions.....	1-20
1.4 References	1-22
Chapter 2: Strategies for Local Governments	2-1
2.1 Getting Ready for Low Impact Development.....	2-1
2.2 Applicable Regulations and Requirements for LID	2-1
Federal and State Stormwater Regulations.....	2-1
Local Regulations and Ordinances	2-3
2.3 Regional Planning Strategies	2-6
Planning for Future Growth Conditions and Patterns.....	2-7
Code and Ordinance Checklists	2-10
Coastal Community Watershed Management Checklist	2-12
How to Incorporate LID into Local Land Use Regulations.....	2-13

Form-Based Code	2-17
Conservation, Land Use, and Stormwater Management Incentives	2-19
Examples of LID in Local Ordinances	2-21
2.4 Neighborhood Planning Considerations for Coastal SC	2-24
LID and Compact Development	2-24
Planned Unit Development	2-25
Transfer of Development Rights	2-27
Incorporating LID into Existing Development	2-27
Retrofitting.....	2-28
Redevelopment	2-28
Infill Development.....	2-28
2.5 Regulatory Strategies	2-30
Site Plan Review Process	2-30
A Coordinated Approach for Stormwater Management.....	2-31
Tracking, Inspection, and Verification	2-32
Enforcement.....	2-33
2.6 References	2-34
Chapter 3: Conservation Principles and Neighborhood Site Design for LID	3-1
3.1 Introduction to Conservation Principles and Neighborhood Site Design	3-1
3.2 Conservation of Natural Areas.....	3-4
Land Conservation Strategies.....	3-5
Preserve and Maintain Open Space	3-9
Protect Critical Resources: Existing Soils, Vegetation, and Wetlands	3-10
Promote Buffers	3-14
Protect and Promote Tree Canopy	3-18
Reduce Impervious Cover.....	3-21
3.3 Neighborhood Site Design Considerations	3-24
LID Roadway Design.....	3-24
LID Parking Guidance	3-36
LID Landscaping	3-43
3.4 References	3-53
Chapter 4: Guide to Stormwater Best Management Practices.....	4-1
4.1 Introduction	4-1
The Runoff Reduction Approach	4-1
LID Design Considerations for Coastal Conditions	4-2
References	4-10
4.2 Bioretention	4-11
Introduction.....	4-11

Key Considerations	4-12
Bioretention Feasibility Criteria.....	4-13
Bioretention Conveyance Criteria	4-16
Bioretention Pretreatment Criteria.....	4-17
Bioretention Design Criteria	4-18
Bioretention Landscaping Criteria	4-28
Bioretention Construction Sequence.....	4-36
Bioretention Maintenance Criteria	4-38
Bioretention References and Additional Resources	4-41
4.3 Permeable Pavement Systems	4-43
Introduction.....	4-43
Key Considerations	4-43
Permeable Pavement Feasibility Criteria	4-47
Permeable Pavement Conveyance Criteria.....	4-49
Permeable Pavement Pretreatment Criteria	4-49
Permeable Pavement Design Criteria	4-49
Permeable Pavement Landscaping Criteria	4-57
Permeable Pavement Construction Sequence	4-57
Permeable Pavement Maintenance Criteria	4-61
Permeable Pavement References and Additional Resources.....	4-63
4.4 Stormwater Infiltration.....	4-64
Introduction.....	4-64
Key Considerations	4-65
Infiltration Feasibility Criteria	4-70
Infiltration Conveyance Criteria.....	4-72
Infiltration Pretreatment Criteria	4-72
Infiltration Design Criteria	4-74
Infiltration Landscaping Criteria.....	4-78
Infiltration Construction Sequence	4-79
Infiltration Maintenance Criteria.....	4-80
Infiltration References and Additional Resources	4-81
4.5 Green Roofs	4-83
Introduction.....	4-83
Key Considerations	4-84
Green Roof Feasibility Criteria	4-85
Green Roof Conveyance Criteria.....	4-86
Green Roof Pretreatment Criteria	4-86
Green Roof Design Criteria	4-86
Green Roof Landscaping Criteria	4-91
Green Roof Construction Sequence	4-93
Green Roof Maintenance Criteria.....	4-94

Green Roof References and Additional Resources	4-96
4.6 Rainwater Harvesting	4-97
Introduction.....	4-97
Key Considerations	4-98
Rainwater Harvesting Feasibility Criteria	4-101
Rainwater Harvesting Conveyance Criteria.....	4-103
Rainwater Harvesting Pretreatment Criteria	4-104
Rainwater Harvesting Design Criteria	4-105
Rainwater Harvesting Spreadsheet	4-112
Rainwater Harvesting Landscaping Criteria	4-116
Rainwater Harvesting Construction Sequence	4-116
Rainwater Harvesting Maintenance Criteria.....	4-117
Rainwater Harvesting References and Additional Resources	4-118
4.7 Impervious Surface Disconnection	4-119
Introduction.....	4-119
Key Considerations	4-120
Impervious Surface Disconnection Feasibility Criteria.....	4-122
Impervious Surface Disconnection Conveyance Criteria.....	4-123
Impervious Surface Disconnection Pretreatment Criteria.....	4-123
Impervious Surface Disconnection Design Criteria	4-123
Impervious Surface Disconnection Landscaping Criteria	4-125
Impervious Surface Disconnection Construction Sequence	4-125
Impervious Surface Disconnection Maintenance Criteria	4-126
Impervious Surface Disconnection References and Additional Resources	4-127
4.8 Open Channel Systems.....	4-128
Introduction.....	4-128
Key Considerations	4-131
Open Channel Feasibility Criteria.....	4-135
Open Channel Conveyance Criteria	4-137
Open Channel Pretreatment Criteria.....	4-138
Open Channel Design Criteria	4-139
Open Channel Landscaping Criteria	4-149
Open Channel Construction Sequence.....	4-150
Open Channel Maintenance Criteria	4-152
Open Channel Systems References and Additional Resources	4-153
4.9 Stormwater Filtering Systems.....	4-155
Introduction.....	4-155
Key Considerations	4-156
Filtering Feasibility Criteria	4-158
Filtering Conveyance Criteria.....	4-159

Filtering Pretreatment Criteria	4-159
Filtering Design Criteria	4-159
Filtering Landscaping Criteria.....	4-162
Filtering Construction Sequence	4-162
Filtering Maintenance Criteria.....	4-164
Stormwater Filtering Systems References and Additional Resources.....	4-165
4.10 Dry Detention Practices.....	4-166
Introduction.....	4-166
Key Considerations	4-167
Dry Detention Practice Feasibility Criteria	4-167
Dry Detention Practice Conveyance Criteria	4-171
Storage Pretreatment Criteria	4-172
Storage Design Criteria.....	4-173
Dry Detention Practice Landscaping Criteria	4-175
Dry Detention Practice Construction Sequence	4-175
Dry Detention Practice Maintenance Criteria	4-177
Dry Detention Practice References and Additional Resources.....	4-178
4.11 Wet Detention Ponds	4-179
Introduction.....	4-179
Key Considerations	4-180
Wet Detention Pond Feasibility Criteria	4-182
Wet Detention Pond Conveyance Criteria.....	4-184
Wet Detention Pond Pretreatment Criteria	4-185
Wet Detention Pond Design Criteria	4-185
Wet Detention Pond Landscaping Criteria.....	4-190
Wet Detention Pond Construction Sequence	4-191
Wet Detention Pond Maintenance Criteria.....	4-192
Wet Detention Pond References and Additional Resources	4-194
4.12 Stormwater Wetlands	4-196
Introduction.....	4-196
Key Considerations	4-197
Wetland Feasibility Criteria	4-198
Wetland Conveyance Criteria.....	4-203
Wetland Pretreatment Criteria	4-204
Wetland Design Criteria	4-204
Wetland Construction Sequence	4-207
Wetland Landscaping Criteria	4-210
Wetland Maintenance Criteria.....	4-215
Stormwater Wetland References and Additional Resources	4-217
